

Annexure A – Article Review

ANNEXURE A – ARTICLE REVIEW

INSTRUCTIONS Select one peer-reviewed research article published after 2019 from IEEE Xplore, Springer, Elsevier, or ACM Digital Library related to Inductive Learning, Decision Trees, Statistical Learning Methods or Reinforcement Learning applications.

TASK 1: ARTICLE SUMMARY (a) Full citation, domain/application area and ML problem. (b) 150–200 word objective summary, research gap and proposed solution.

TASK 2: METHODOLOGY ANALYSIS (a) Explain ML techniques and dataset: size, features, source and preparation. (b) Map technique to CO4; identify one strength and one limitation.

TASK 3: RESULTS & CRITICAL EVALUATION (a) Report key results and create a comparison table if applicable. (b) Critically evaluate realism, bias, evaluation protocol and additional experiments. (c) Discuss real-world applicability and industry scaling challenges.

TASK 4: REFLECTION & LEARNING OUTCOME (a) State three key insights connected to CO4. (b) Propose one novel experiment or enhancement and justify feasibility/impact.
